

## Test kits for NSTS Testing Scheme

### Each test kit (01TESTCASE-XXX) consists of:

- 1 litre calibrated measuring cylinder
- Master pressure gauge certificated to BS EN 837-1:1998. Accuracy tested to  $\pm 1\%$  FSD limits.
- 1 x Multi-port gauge adaptor
- 1 x Nozzle pressure testing kit (select from part numbers below). The case has compartments to accommodate 3 extra nozzle pressure testing kits which can be bought individually.
- Stopwatch
- Sturdy case with protective foam padding.

### Part numbers:

01TESTCASE-EF1	to suit EF1
01TESTCASE-EF2	to suit EF2
01TESTCASE-EF3	to suit EF3
01TESTCASE-HARDI	to suit Hardi
366010100	Master Pressure Gauge
360Q3166	Multi-port Pressure Gauge Testing Adaptor
3615088385	Stop watch
01TESTKITCASE	Empty case

### Nozzle Pressure Testing Kits:

361Q3168	to suit Eezifit 1 nozzle body holders
362Q3168	to suit Eezifit 2 nozzle body holders
363Q3168	to suit Eezifit 3 nozzle body holders
364Q3168	to suit Hardi nozzle body holders

### Set of 7 Measuring Jugs

With printed graduations, one each of 5L, 3L, 2L, 1L, 500ml, 250ml, 100ml.  
Part no: 01JUGSET07

### Calibrated Measuring Cylinders

01LMYC001 – 1 litre calibrated measuring cylinder  
01LMCY002 – 2 litre calibrated measuring cylinder

## Portable Patternator

The portable patternator is used to accurately check that liquid is being dispensed evenly across the boom. It unfolds to 3m widths and folds away for easy storage or transport. Integral wheels for ease of manoeuvring. The floating balls in the tubes will present a picture of the sprayers pattering and will highlight any variation in nozzle output or distribution.

3m patternator	Part no.: 010Q2315
1m replacement panels	Part no.: 010Q2316
Spare tubes	Part no.: 010Q2306
Spare balls	Part no.: 010B8600

## Instant Calibrator

Gives instant accurate flow rate readings in litres per minute allowing adjustment of the pressure until the correct flow rate is obtained.  
Part No. 01-IC310
